

# Innovation in e-publishing

## Lectrix

*Lectrix* is a powerful online tool designed to help students read Greek and Latin texts in the original language by providing them with all the information required to actively construe a text at the click of a mouse.

### Content

Four Greek and four Latin texts are on offer. The main focus of the interface is on the text, which is complemented by a range of study tools.

Each text is supported by a dictionary, a grammatical parser, an English translation, basic and Cambridge Greek and Latin Classics commentaries and a library of web pages with background material on grammar and content.

### Key features

- Innovative product designed to help students interpret Greek & Latin texts in the original language with increased fluency and engagement
- 8 key Greek & Latin texts
- Extensive range of study tools including dictionary definition, parser, basic and advanced commentary and translation
- Clear, intuitive interface
- Invaluable for self-study, equally at home and in the classroom
- Collaborative project between the Faculty of Classics, University of Cambridge and Cambridge University Press
- Dedicated customer support teams

### Subject Areas Covered

- Greek and Latin
